

What People Are Saying about Their Growth Group

These are direct quotes from the Feedback forms:

- I am spending more time in the word and applying God's truth to my everyday life.
- It is the most beneficial use of an hour and a half.
- Spending more time with other adults helps me pay more attention to the sermons.
- We really connected as a group and became like a family. We had great discussions and really learned from each other.
- I am eager to get to church every Sunday. Ready to hear the Word and ready to participate in my Growth Group.
- This is where I made my friends at church and really felt connected to the body of Christ.
- I have been more invested in prayer because of my group's encouragement and example.
- I formed some very meaningful relationships through Growth Group and love knowing people when I come to church. It is also nice for my husband and me to develop friendships with people of all ages and different stages of life.
- I feel more committed and more connected to church.
- I am more solid in my life. More confident and "armed" to go out in the world and speak truth in love and stand firm in my convictions.
- You are missing out! (*if not part of group*). Now I know why this is called "Growth Group". I was stalemated until I joined.
- I was not for the growth groups at first; now I wish every member could be a part of some group.
- We have experienced some very trying times in our family recently with the birth of a new baby and some significant health issues. Our Growth Group brothers and sisters have loved us, served us, prayed for us, watched our kids, and much more. We don't know where we'd be without them.
- It is a very helpful experience; gives you the opportunity to share and fellowship with other Christians in your own age group and to have anything that you didn't get a full understanding of during the service fully explained.
